on a truck team, that the flesh burst open to the bone.

The new shoe factory at Waldoboro will be started next week. The contract was closed Saturday with W. H. Daniels of Norwell, Mass. The factory was built by the town, and leased for five years at a nominal rent. The pay roll will reach \$50,000 annually.

A number of lumbermen coming out of the woods became engaged in a fight at Smyrna Mills, Saturday, over some rum. During the row Peter Michaud of Houlton, was seriously stabled in the breast. The assailant and several witnesses have been arrested and lodged in jail.

The schooner Lester A. Lewis, for Mo. arrested and lodged in jail.

The schooner Lester A. Lewis, for Mobile, was run into by the steamer City of Savannah. The schooner was struck on the port quarter and her stern completely cut off. She was flooded with water, and Capt. Hatch was drowned while asleep in the cabin. He leaves a wife and five children in Islesboro, Me.

dren in Islesboro, Me.

Capt Marston of the schooner Annie T.
Bailey of Gardiner, Me., reports that Friday, in the lower bay of New York, he was run into by the Inman steamer Indians for Liverpool. The steamer crossed the schooner's bows, carrying away her jibboom and bowsprit and disabling her windlass so that she could not let go her anchors. The schooner was towed to Harlem.

lem.

Emery & Holmes, shoe manufacturers at Saco, have under consideration the advantages of an ofter from parties in Taunton, Mass., to move their factory to that city. They will probably accept the proposition and move there in July. The senior member of the firm has just arrived home from the South and he will go to Taunton to further investigate the matter. The firm employs an average of seventy-five hands the year round.

On Saturday, the deeds were passed completing the purchase by the State of

Thursday morning the Old Dominion teamer Wyanoke came in collision, on the

anoke and will be sent home.

Saturday afternoon the lasters employed at Caldwell & Libby's shoe factory, in Richmond, suspended work. This action is the outcome of an old grievance and the end no one can foretell. As the matter now stands the lasters ask a certain advance and the firm refuse to give it. The lasters claim that they ask no more than is due them and the firm represent that they cannot afford to allow the advance.

There was a serious accident at the

At a meeting of the trustees of the Bay

At a meeting of the trustees of the Bay State Agricultural Society, recently held, the proposition to hold a spring exhibition was talked over, but the sentiment seemed to be adverse. It was voted to hold an exhibition in Boston this fall, unless something should arise which seemed to the executive committee a serious obstacle.

Twenty years ago no one saw where all the changes and improvements in agricultural affairs were coming in. No one questions but improvements are still to be made, and he who is active in his investigations, and progressive in his methods, will catch on to them first and secure the advantages coming with advance knowledge. Has anybody found out how cheap a wrong that the

Has anybody found out how cheap a and change the apound of butter can be produced? It is said J. N. Muncey, a well-known lows Holstein breeder, has been experimenting with a view to finding out the approximate cost of a pound of milk and a pound of butter. The results with two cows a There doesn't (Holsteins) were an average food cost of 38 3-10 cents per 100 pounds of milk, and a trifle over 8 3-10 cents per pound for butter. Can any Jersey cows show a better record? A pedigree however long, says President best for attent to think of the ciation, should never save a worthless dairy cow from the shambles, or cause her

dairy cow from the snamoles, or cause her to be sold to others, and thus ruin the reputation of the breeder and his herd, and destroy public confidence in pedigree. While we may, and should, discard merely historic pedigrees, we cannot afford to ignore

State those based upon genuine hereditary merit. A movement has been on foot in several States to enact laws requiring all beef sold, to be inspected before slaughter within the State where sold, the design being to defeat the monoply of Chicago dressed beef, and give the home product a chance to live. A desnated from Columbus Chic.

to live. A despatch from Columbus, Ohio. to live. A despatch from Columbus, Ohlo, states that the Braman beef bill, so called, has been passed, the purport of which is to the above effect. This is the first State to reach an enactment, and it is possible that others may follow the example, with something more than agitation.

One of the most bare faced outrages yet in the manus of a trust is a combination of the manufacturers of binding twine for use on the self-binding reapers for the purpose of controlling the price on They see the for the purpose of controlling the price on the same. Already an advance has been through the the same. Already an advance has been through the dande from 9 up to 24 cents a pound. The wheat growers of the country are greatly instruction. If seemed at the move and are organizing once will be e sagainst it. In some States they have combined to bind their grain by haud rather methods of n than submit to such an outrage. In Dako- measure the re ta a move is on foot to establish a large next ten year manufactory, and manufacture flax fiber good we could There is but a limited demand at present specific work?

There is but a limited demand at present for sun-dried apples. Most of this grade comes from Maine and New Hampshire, but sun-dried frint is losing favor, evaporated apples being better liked. The market is supplied with "evaporated" stuffrom all over the country, though New York furnishes the chief bulk during the consumption season, April, May and June. Those apples evaporated in the New England States have a little more flavor, but prices are the same all round. In New York State the popular apples for evaporating purposes are the Baldwins and Greenings. A few sun-dried apples are still sent abroad, but the shipments of evaporated fruits to European markets is increasing year by year.

The albuminoids, sometimes called protein, are the principal nitrogenous portions of the fodders. It is out of this class of nutrients that the muscular structure of an asimal is formed, hence they are sometimes denominated muscle formers. The albuminoids are not known to be definite compounds, but are made up of a large number of nitrogenous products classed number of nitrogenous products classed the international alike for feeding purposes. Albumen and clusters this effective comment that the comment of the comment comment that the comment gluten are common examples of this class erament this eff of products.

Mirogen—free extract—that is, extractive matter, nitrogen—free, or free of nitrogen—free matter, nitrogen—free extract—thydrates, or carbhydrates, is a mixture of various substances found in fodders, such as starch, sugar, gum, and several other nutrients found in lesser quantities. Their office in sammal economy is the laying on of fat and the maintenance of heat.

Rat is a constituent of all fodder materials, and is a mixture of oils, wax, colorlag matter, &c. Common examples are already engaged. rials, and is a mixture of oils, wax, colorlag matter, &c. Common examples are
found in linseed oil, cotton seed oil and
form oil. As nutrients they serve to keep
up the material heat of the animal, furnishing about two and a half times as much
heat as the starch, sugar, &c., of plants.

Orade fiber, or woody fiber, cellulose, is
the woody portion of vegetable matter, and
ta the lesse valuable, directly, of any of
the fodder nutrients.

As is the mineral portion of plants, or
that indestructible portion which remains
after burning. It forms the frame-work of
the animal, and occurs in small quantities
in the muscles and blood.
